

- Forehead lines (worry lines)
- Glabellar lines (frown lines)
- Periorbital lines (crow's feet)
- Nasolabial folds (smile lines)
- Peri-oral wrinkles (vertical lip lines)
- Lip Border
- Oral Commissures (Marionette lines)
- Lip augmentation
- Revitalization of the face, neck & décolleté

#### What are DERMAL FILLERS?

The growth and popularity of Dermal Fillers is currently subject to a dramatic increase. The most widely used and accepted product filler group, is composed of Hyaluronic Acid (H.A.). H.A. is a natural substance, that is found throughout the body and in particular in the skin. H.A. is biodegradable and meet to a large extend consumer's demands, because it is quick, safe, effective and relatively inexpensive.

#### What is CRISTAL?

**CRISTAL** is a sterile, injectable hydrogel, produced by cross-linking H.A., of non-animal origin. **CRISTAL** is used in Aesthetic Medicine, to fill tissue defects in the facial area, reshaping the contour of the face, enhancing the lips, and rejuvenate the face, neck and décolleté area. The contents of **CRISTAL** are biocompatible and safe in their application and behaviour in tissue, upon implantation. **CRISTAL** is the first choice of physicians and patients, in their desire for Dermal Filler Product, that is: safe, effective, non-animal, long-lasting and quick to perform, comfortable, cost effective, with excellent results, natural appearance and feel.

#### What areas can be treated?

Correcting the lines and wrinkles associated with Aging, as well as acne scars, lip augmentation and hydrating/rejuvenating the face.

#### CRISTAL is available in 4 different forms:

- CRISTAL No. 1:** For superficial wrinkles
- CRISTAL No. 2:** For deep wrinkles
- CRISTAL Lips:** For lip augmentation
- CRISTAL Soft:** For hydration/rejuvenation of the face (mesotherapy)

#### How are treatments done?

Injections are given into the area, using a small needle. **CRISTAL** is injected into the skin, in order to lift up wrinkles, or add volume to the lips, or to rejuvenate the face. The treatment is very easy and quick process and can be carried out immediately, within 10-15 minutes.

#### How long does the effect last?

The results are immediate and impressive. Eventually, the implant is gradually absorbed and totally disappears from the body. How long the effect of the treatment lasts, is very individual. It depends on many factors, such as the structure of the skin, lifestyle and ages, as well as on the degree of perfection, demanded by the individual. Most patients, chose to have touchup treatments done, within 6-12 months of the original treatment.

DERMAL FILLERS OF HIGHEST QUALITY

## ΜΕΣΟΘΕΡΑΠΕΙΑ

**Η λύση για θεαματικά αποτελέσματα στην μεσοθεραπεία.**

Η μεσοθεραπεία με αλουρονικό οξύ βελτιώνει την όψη και την ελαστικότητα του δέρματος. Επιτυγχάνει σύσφιξη ενυδάτωση και αναζωογόνηση του δέρματος μειώνοντας σημαντικά τις ρυτίδες.

Η μεσοθεραπεία επιβραδύνει την γήρανση του δέρματος που προκαλείται από εσωτερικούς παράγοντες (ηλικία, ορμόνες, γονίδια) καθώς και εξωτερικούς παράγοντες (έκθεση στον ήλιο, μόλυνση του περιβάλλοντος, κάπνισμα κ.λ.π.).

## MESOTHERAPY

**The solution to optimize results in Mesotherapy**

Mesotherapy with High Purity hyaluronic acid improves the tone and elasticity of the skin. It achieves a firmer and smoother look, a better-hydrated and rejuvenated skin, minimising the presence of wrinkles.

Mesotherapy fights against skin changes caused by the ageing process as well as intrinsic conditioning factors (age, gender, oestrogen condition) and extrinsic factors (sun exposure, contaminated surroundings, smoking, etc.)
